Code	Description	Links
200	Composer Deleted	No links

Update Composer by Id SoapUI Test

The screenshot displays the SoapUI interface for configuring a REST client request. The top bar includes tabs for 'TestSuites', 'WS-Security Configurations', and 'Security Scan Defaults', along with a 'Try ReadyAPI' button. The main window is titled 'Request 1' and shows the following configuration:

- Method:** PUT
- Endpoint:** http://localhost:3000
- Resource:** /api/composers/{id}
- Parameters:** (empty)

The 'Request' tab is active, showing a table of parameters:

Name	Value	Style	Level
id	648f812f1954...	TEMPLATE	RESOURCE

Below the table, there is a 'Required:' section with a checkbox 'Sets if parameter is required' which is currently unchecked. The 'Media Type' is set to 'application/json' and 'Post QueryString' is unchecked. The 'Raw' tab is selected, showing the request body as a JSON object:

```
{
  "firstName": "Robert",
  "lastName": "Redford"
}
```

The 'Response' tab is also visible, showing a JSON response:

```
{
  "id": "648f812f1954eda4f3a40508",
  "firstName": "Robert",
  "lastName": "Redford",
  "_v": 0
}
```

At the bottom, the status bar indicates 'response time: 149ms (84 bytes)' and a '1 : 1' ratio.
